HIGHLIGHTS

- Develop and execute the right cloud strategy to meet your business needs.
- Modernize your IT infrastructure while balancing self-service, the needs of the business, and control.
- Create a cloud management regime that defines what needs to be managed and where and how to manage it.
- Maximize your cloud investment with advanced services, such as big data, advanced analytics, and DevOps.

Whether you’re already in the cloud or considering a move, Pythian can help plan, implement, and manage all aspects of your cloud environment. Our extensive expertise in creating strategies, and implementing and managing public, private, and hybrid environments means lower risks, reduced costs, and maximum performance for your enterprise.

We can assess your current infrastructure and application environment. We’ll map out the best cloud service providers and create an architecture best suited to your enterprise. From there, we’ll help you create a detailed plan, and then implement and manage your solution.

Our cloud teams combine more than 215 years’ experience and have multiple certifications in advanced technologies and public cloud platforms, including Amazon Web Services, Google Cloud Platform, and Microsoft Azure.

We have deep expertise across a wide set of technologies, but we don’t sell hardware or software, so we’re vendor neutral and only recommend what’s best for your business. Operating with a collaborative and augmented team approach, we offer complete solutions with flexible and agile engagement models.
SERVICES

STRATEGY
We work with you to develop a cloud strategy that strikes the right balance between agility, efficiency, security, and compliance. Our consultants will assess your current IT environment and work with you to develop a business case. The key objective of this phase is to develop a strategy that lets you maintain current applications and revenue streams while introducing a roadmap for a next-generation cloud model.

PLANNING
In the planning phase, we provide a detailed design of your architecture, technology orchestration, and help you choose a service provider and services based on your unique requirements. From there, we plan for the migration of servers, databases, applications and platforms, and optimize application lifecycles.

IMPLEMENTATION
Implementation is the realization of Pythian’s thorough planning process. We develop, install, and configure components of your customized solution. At this stage, your cloud infrastructure and database services are turned on and configured. Next, we migrate your infrastructure, platforms, databases, data, and applications to the cloud. Finally, the application life cycle is orchestrated, and your new cloud environment is up and running.

MANAGEMENT
Pythian continuously monitors the operational health of your solution, and optimizes applications and databases on an ongoing basis enabling nimble responses to changing markets and business requirements.

NOT YOUR ORDINARY OUTSOURCING PARTNER

TECHNOLOGY-ENABLED EXPERTS
Elite technical teams to help you use technology for competitive advantage. Transform for velocity, automate for efficiency, and maintain operational excellence for security, reliability, and performance.

AGILE, GLOBAL TEAMS
Pythian hires only elite technical talent and organizes them into tightly knit, dedicated teams, who are available globally 24 hours a day, seven days a week.

FLEXIBLE CONTRACTS
Pythian offers flexible, month-to-month contracts, so you are not locked in long-term. You can easily increase, reduce, or cancel your contract with only 30 days’ notice and experience the Pythian difference risk-free.

BEST-IN-CLASS SECURITY
Top talent, mature methodologies, and industry-leading tools for complete peace of mind. Our advanced, secure service delivery processes provide the industry’s best standard of care for our clients.

ABOUT PYTHIAN
Pythian is a global IT services company that helps companies compete by adopting disruptive technologies such as advanced analytics, big data, cloud, databases, DevOps and infrastructure management to advance innovation and increase agility. Pythian’s highly skilled technical teams work as an integrated extension of our clients’ organizations to deliver continuous transformation and uninterrupted operational excellence.
